DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to apparatus, classified in class 83 subclass 350.
- II. Claims 2-9, drawn to a method, classified in class 83, subclass 013.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, Invention II performs a method that includes lowering the shear cassette with bearing chocks of the shear cassette. Since Invention I does not disclose a shear cassette with bearing chocks, Invention I must be able to perform a method that does not including lowering the shear cassette with bearing chocks, such as, for example, the lifting means could be a hydraulic apparatus for raising and lowering shear cassette.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
